Subject: Stack Height Increase - St. Francis

Hi Manoj-

This is just a quick email to confirm our discussion from last week regarding the planned stack height increase at our St. Francis facility. Per our discussion, we are dealing with WDNR for this project, so as long as they are okay with the project, we are free to continue as planned. US EPA is relying on WDNR to ensure we aren't adversely affecting the modeling completed in the past that showed us to be in compliance. Does this accurately summarize our conversation? Please let me know if I left anything out.

Thanks!
